💻 github.com/andrehickmann

Senior Fullstack Engineer with 23+ years of experience developing complex, scalable software solutions. Specialized in modern technologies, cloud architecture, and end-to-end product development. Open to a full-time role in Berlin or remote (Hybrid with remote component also works).

> **Core Competencies:** Fullstack Development (Frontend, Backend, Cloud) • Requirements Engineering • Testing & Quality Assurance • Product Architecture • End-to-End Delivery • Technical Specification • Code Reviews • Mentoring

Technology Stack

Backend & Architecture
Node.js, Java, Scala, PHP, Go, API Design, Domain Driven Design

Frontend & Experience
Vue.js, React, TypeScript, Angular, Design Systems, Microfrontends

Cloud & Infrastructure
AWS, Docker, Kubernetes, Helm, ArgoCD

Delivery & Quality
CI/CD, Observability, Test Automation, E2E Testing, SRE Practices

Data & Integration
PostgreSQL, MySQL, PostGIS, MSSQL, Redis, Kafka, Event Streaming

AI & Automation
LLM Integration, RAG, Document Analysis, Workflow Automation

Professional Experience

01/2018 – present
Senior Fullstack Engineer · brayn.io
End-to-end product development with JavaScript/TypeScript (Vue, React, Node.js), Backend (Scala, PHP, Java, Go), Cloud Infrastructure (AWS, Docker, K8s), Requirements Engineering, technical specification, code reviews, software analysis, maintenance & modernization of existing systems, mentoring.

08/2008 – 12/2017
Company Founder / Partner · swepp GmbH
Online portals for law firms, insurance integrations (GDV), DMS implementation, training & documentation.

01/2003 – 07/2008
Self-Employment / Solo Entrepreneur
Development & operation of websites, online shop, CMS system, computer courses.

Selected Projects (Excerpt)

Research Center Sustainability (Multiple Projects) — 2025 – present
Vue2→Vue3 migration, timeseries visualization, water/air quality data (Grafana).

Research · Vue · Data · Sustainability

AI Projects (Anonymized) — 2025
Receipt recognition, document analysis, automated evaluations and code generation.

AI · Python · Automation

AgriTech Machine Control — 2025
Camera/ML-based control for weed elimination via laser.

AgriTech · ML · Edge

Biodiversity Compliance Platform — 2024
GIS heatmaps, action items, frontend (React) and backend (Python).

Sustainability · GIS · React · Python

Ticketing Platform
2024

Conception & development for ticket sales, venue/artist management, payment.

Ticketing Web Payments

Streaming & Competitions
2024

Short-video platform with competitions and wallet logic (Web + Ionic).

Streaming Ionic Vue Mobile

Bowling Software Suite
2023

Lane control, booking, gastronomy, payment (Vue/Scala/Java).

POS Vue Scala Java

Telemedicine & Video Consultation
2023

Appointment portal with video conferences, TURN/STUN setup, Scala backend.

Health Vue Scala Realtime

E-Bike Benchmarking
2022

Digital benchmark room for cost analysis from parts to complete bikes.

Mobility Data Product

Tax Advisory Software
2021 – 2026

Accounting and annual financial statement software for large enterprises.

Finance B2B Vue Scala

Fashion Commerce Integration
2021 – 2025

Invoice/return portal, monitoring, vouchers, international tax rates.

Commerce Integration Payments

Insurance Portal (Broker)
2020 – 2022

REST/SOAP integration, form generator in Vue/TypeScript, frontend migration.

InsurTech Vue Java Integration

FinTech Invoicing Platform
2018 – present

Invoicing, customer management, dunning, bank integration, dispatch.

FinTech Vue Scala PHP

Industry & Domain Experience

FinTech & Banking · Mobility & Logistics · HealthTech · E-Commerce · SaaS & B2B Platforms · Energy & Sustainability · Media & Publishing · Public Sector

Education & Qualifications

School Education: 10th Grade (Realschulabschluss / Secondary School Certificate)
Further Education: Self-taught in software development, cloud architecture and modern web technologies
Languages: German (Native), English (Fluent spoken and written)
