Senior Fullstack Engineer with 23+ years of experience developing complex, scalable software solutions. Specialized in modern technologies, cloud architecture, and end-to-end product development. Open to a full-time role in Berlin or remote (Hybrid with remote component also works).

Core Competencies: Fullstack Development (Frontend, Backend, Cloud) • Requirements Engineering • Testing & Quality Assurance • Product Architecture • End-to-End Delivery • Technical Specification • Code Reviews • Mentoring

Technology Stack

Backend & Architecture

Node.js, Java, Scala, PHP, Go, API Design, Domain Driven Design

Cloud & Infrastructure

AWS, Docker, Kubernetes, Helm, ArgoCD

Data & Integration

PostgreSQL, MySQL, PostGIS, MSSQL, Redis, Kafka, Event Streaming

Frontend & Experience

Vue.js, React, TypeScript, Angular, Design Systems, Microfrontends

Delivery & Quality

CI/CD, Observability, Test Automation, E2E Testing, SRE Practices

AI & Automation

LLM Integration, RAG, Document Analysis, Workflow Automation

Professional Experience

01/2018 – present

Senior Fullstack Engineer · brayn.io

End-to-end product development with JavaScript/TypeScript (Vue, React, Node.js), Backend (Scala, PHP, Java, Go), Cloud Infrastructure (AWS, Docker, K8s), Requirements Engineering, technical specification, code reviews, software analysis, maintenance & modernization of existing systems, mentoring.

08/2008 – 12/2017

Company Founder / Partner · swepp GmbH

Online portals for law firms, insurance integrations (GDV), DMS implementation, training & documentation.

01/2003 – 07/2008

Self-Employment / Solo Entrepreneur

Development & operation of websites, online shop, CMS system, computer courses.

Selected Projects (Excerpt)

Shopping Platform & Website Builder (Pharmacies)

2025 – present

Headless commerce on Vendure, website builder for branches, payments via PayPal and Stripe.

Commerce Vendure Payments Vue

Agentic Coding Portal (Internal)

2026 – present

Git, Jira, Confluence and AI-assisted coding in one place – developer portal for our own company.

AI DevTools Integration Platform

Research Center Sustainability (Multiple Projects)

2025 – present

Vue2→Vue3 migration, timeseries visualization, water/air quality data (Grafana).

Research Vue Data Sustainability

AI Projects (Anonymized)

2025

Receipt recognition, document analysis, automated evaluations and code generation.

AI Python Automation

AgriTech Machine Control Camera/ML-based control for weed elimination via laser. AgriTech ML Edge	2025
Biodiversity Compliance Platform GIS heatmaps, action items, frontend (React) and backend (Python). Sustainability GIS React Python	2024
Ticketing Platform Conception & development for ticket sales, venue/artist management, payment. Ticketing Web Payments	2024
Streaming & Competitions Short-video platform with competitions and wallet logic (Web + Ionic). Streaming Ionic Vue Mobile	2024
Bowling Software Suite Lane control, booking, gastronomy, payment (Vue/Scala/Java). POS Vue Scala Java	2023
Telemedicine & Video Consultation Appointment portal with video conferences, TURN/STUN setup, Scala backend. Health Vue Scala Realtime	2023
E-Bike Benchmarking Digital benchmark room for cost analysis from parts to complete bikes. Mobility Data Product	2022
Tax Advisory Software Accounting and annual financial statement software for large enterprises. Finance B2B Vue Scala	2021 – 2026
Fashion Commerce Integration Invoice/return portal, monitoring, vouchers, international tax rates. Commerce Integration Payments	2021 – 2025
Insurance Portal (Broker) REST/SOAP integration, form generator in Vue/TypeScript, frontend migration. InsurTech Vue Java Integration	2020 – 2022
FinTech Invoicing Platform Invoicing, customer management, dunning, bank integration, dispatch. FinTech Vue Scala PHP	2018 – present

Industry & Domain Experience

FinTech & Banking	Mobility & Logistics	HealthTech	E-Commerce	SaaS & B2B Platforms	Energy & Sustainability
Media & Publishing	Public Sector				

Education & Qualifications

School Education: Secondary School Certificate (10th Grade) • General University Entrance Qualification (Abitur)
Vocational Training: State-certified Technical Assistant for Information Technology
Studies: Media Informatics (undergraduate, no degree)
Further Education: Self-taught in software development, cloud architecture and modern web technologies
Languages: German (Native), English (Fluent spoken and written)
